

Geology with Occult Correlations.

- I. The story of the universe and of man to be found in all fields of study.
- II. The earth divided into three spheres
 - A. Atmosphere - Tendancy to fill all space equally - Great activity of molecules.
 1. Corresponds to spiritual vehicle.
 2. Upper part the mouth of earth, lower part stomach.
 - a. Hence to transcend death one should live high.
 - B. Hydrosphere - Molecules still free moving but tend to draw together, hence beginning of specific or personalized form.
 1. Corresponds to shukshma sharira, or astral body.
 2. If earth true sphere would cover whole earth several thousand feet.
 - C. Lithosphere - Molecules confined to fixed orbits of motion. Attraction between molecules strong.
 1. Corresponds to gross or physical body
 2. Old idea that center of earth was molten now abandoned. Give reasons.
 - a. Independence of volcanic action.
 - b. Transmission of earthquake waves.
 - c. Absence of general tidal effects as of liquid interior.
 - d. Evidence that warm and cold periods have alternated as far back as we can study.
- III. Action of creative, preservative and destructive forces in geology.
 - A. Building of mountains by volcanic action, by lateral pressures causing folding and warping and by erosion.
 - B. Tearing down of mountains by erosion, frost air
 1. Leads to building of plains.
 - C. Preservation of mountains by plant life.
 - D. Significant that that which is destructive to one form creates another.
 1. Broken up igneous rock produce material for sedimentary rock.
 2. Erosion of mountains enrich valleys
 3. Volcanic action which destroys ~~mountains~~ valleys builds mountains.
 - E. Show how this action applies to life: all destruction is creation in another sense.
 1. Hence importance of seeing a proper place for all things in universe regardless of one's own function.

*Refer to the different types of conservation
belonging to different sections of country
Discuss cycles as shown in animals from small to large
and small again. Also periodicity of warm and cold
periods*
