

Wisdom Religion and Science

"We are at the close of the cycle of 5,000 years of the present Aryan Kali Yuga; and between this time and 1897 there will be a large rent made in the Veil of Nature, and materialistic Science will receive a death-blow". S.D. 1 671

*The Philosopher's Stone is the Mysterious and Supreme agent which carries the power of transmutation. There is one Reality in the Universe and This is made manifest through many modes and forms. A form represents a stage of consciousness. The force of inertia tends to hold the stages of consciousness fixed. The transcending agency which ever drives against this inertia leading from stage to stage is the Mysterium Magnum. It is the eternal Driving Force in Nature. It has ever been symbolized by the Serpent. In man it is the Kundalini.

Nothing in the universe can become nothing. But base modes of consciousness may become sublimated. This is what redemption means.
