

## THE LAW OF CYCLES

Concrete motion never motion in a straight line.

The Newtonian law an abstraction valuable for analysis.

Actual motion in a straight line would involve a run down universe.

4. Perpetual motion involves cyclic return into itself.

In highest metaphysical sense there is no development or evolution.

The algebraic sum of all process is zero

The unsoundness of the straightline concept of evolution developed in western science.

Implies the assumption of a cause inadequate for effect

Motion or development in the occult sense is circular or cyclic

Every impulse returns into itself

Illustrate in analysis of tone waves

Development involves involution as the condition of all evolution.

Manifestation of worlds and races in cycles

This is combined with the seven-fold nature of manifested Being

Reasons for seven-fold division.

Three and four give seven

Permutations of triune Being.

Development of humanity in rounds and rings

Leads to implication that there is a season for all things.

Illustrate by keys being given out now.

~~Humanity at present far behind in its~~

Degree of advancement of any unit of humanity limited by law of cycles

The bounds of any cycle constitutes a ring "pass not!"

Present humanity far behind the cycles in its development

Could mean disintegration of planet if not over come.

Hence unusual help extended to humanity.

Hence also the more than usual importance of assuming our end of the task.
