Franklin Merrell-Wolff
c/o The Julian Press, Inc., Publishers
150 Fifth Avenue
New York, N.Y. 10011

Dear Mr. Merrell-Wolff,

I have been deeply moved by your two books,
Pathways Through to Space and The Philosophy
of Consciousness Without an Object. I have
spent most of this lifetime on the search for
truth and feel very privileged to have been
led to your books. I have two questions; is
a meeting with you possible; and, do you
accept students?
Thank you for your major contribution to
my life.

Sincerely,

A handwritten signature in cursive script that reads "Kay Roland". The signature is written in dark ink and is positioned above the printed name.

Mrs. L. A. Roland

Sept. 3, 1980

Dear Mrs. Roland,

We have received your letter of July 9, 1980. In answer to your first question, yes, it is possible to meet with Dr. Wolff. Dr. Wolff would like to meet and be of help to all serious seekers who are attracted by his teachings. However he is up in years now (93 to be exact) and even though in good health, he ~~tires~~ tires easily and new comers especially draw on his energy.

I have included a mimeographed information sheet and a map with this letter.

Dr. Wolff is planning a trip to Phoenix, Arizona sometime in the latter part of October and probably will be away for about two weeks - so it might be well to write again before you come. Our address here is: P.O. Drawer "F", Lone Pine, California, 93545.

Looking forward to meeting you, I am,

Yours truly,

Thomas Stotick

House keeper to F. F. Woeff.

5298 N. Harvard
Portland, Ore
97203

Dear Mr. Stolick,

Thank you very much for answering my letter concerning meeting Dr. Wolff, and for the map and directions.

My husband and I are very much interested in attending one of the Sunday meetings and plan to come to the one on November 23rd. I am glad that you explained your situation for us. We will come this time only for the Sunday meeting and the hope of meeting Dr. Wolff briefly and are grateful this is being made possible for us. We will drive from Portland, Oregon so if there is anything from this area that we could bring for you, we would be happy to do so. We will start back again Sunday evening and handle our meals and lodging in town.

Because we have been so deeply moved by Dr. Wolff's books, we would like to know if any other materials (tapes, written works, etc) are available to buy. Also we will happily pay any fees for the tape plays.

If the above date is acceptable, it is not necessary to answer this letter as we understand a large volume of correspondence could be burdensome.

Thank you again for writing. We are looking forward to meeting both of you very, very much.

Sincerely,

Kay Roland

December 2, 1980

Dear Dr. Wolff,

My husband and I wish to thank you for the opportunity to meet you and hear your Sunday tape. We felt very privileged to share your home and table; thank you.

After we left the house we hiked up to the ashrama. It was an invigorating climb and I went through the building and out the north side and sat on a rock looking into the valley. Within a very few minutes, a strong gusty wind snapped my attention by literally picking up my hair; it was as though it originated on the spot where I sat. After that the wind increased and we had a very strong gale going by the time we returned to the car.

We are listening to the tapes we bought from you and finding them of great interest and assistance. In listening to the second tape on the Fundamentals, I realized how very similar your route and descriptions are to L. Ron Hubbard's. I am sending you a copy of 8-8008 in which he maps a course of reducing one's objective universe from infinity (8 being close to the infinity symbol) to zero and expanding one's subjective universe from zero to infinity. Please understand that I know your work stands as a completed whole and my sending similar literature is simply because I feel you will enjoy very much the work of another great mind. Please read "The Factors" in the beginning of the book and see if you do not agree that they were the expression of a mind that has had a similar realization to your own. I am going to send Mr. Hubbard your aphorisms. I do not know if he is familiar with your work or not, but I will write to him about it. We are also sending you a copy of his axioms and logics.

Our very best wishes to you and our deep gratitude for your contributions to mapping the route.

Sincerely,

Kay Roland
Leonard and Kay Roland
