March 21, 1963.

Dear Dr. Franklin Wolff:

GREETINGS: Such a cold unsettled winter this year I didnot return to the Valley as yet so you will see me later when I am near by. I'll bet you felt the low temperatures too, way up there in your Eagle's Nest, but yet the changes makes a man strong and maybe you can go to Tibet then???? Yogees are not down to the lower consciousness ^{any way} ~~any way~~ so dont care very much how it is???????

Thank you for the little booklets - The Bulletin - they are very interesting especially your articles. Theosophy was one of my early studies and I met Annie Besant many times as they had meetings in the same building I had my office at 7th & Grand. She was wonderful as a lecturer and teacher. Those were happy days but lots of water has flown under the bridge since then and experiance has been a stern teacher. It has been my luck to meet many Illuminati and direct conformation of facts has advanced my scientific understanding of the ascension into the higher states of consciousness with thrilling results. I like to take things apart and get right down to workable principle for it makes life easier to understand. If we had a common terminology used by all occult and mystical groups we would find the working principle exactly the same and a united brotherhood would be the result. That is somthing to work for but a long path ahead. However I find the more one knows and realizes the more silent one becomes.

I was so happy to meet with you again Franklin and hope to see you again in the near future. You have a nice set-up and a wonderful location so life ought to be very interesting to you. So bye for this time and my best wishes to you both.

Sincerely yours,

John H. Clark D.R.
